

STABILITY

EI•GJ 1.0

The new Stability shaft from Breakthrough Golf Technology.

Breakthrough Golf uses a scientifically advanced multi-material design with new geometries never used in putter shaft design before. A shaft that has the same look, solid feel and weight as traditional steel putter shaft.

PLAYER TESTING

Major Champion & Hall of Famer

The Stability shaft gives the putter a more consistent face angle versus traditional steel shafts. That translates to a more consistent launch direction and distance control, which equals more putts made.
