Stability Shaft Comparison.

The Most Advanced Putter Shafts Available.

Stability Tour

- Tour preferred.
- Balances like steel. Allows for exact swing weight matching.
- New, sleek body design.
- Contemporary blackout appearance.
- Softer feel preferred by better golfers.
- High modulus carbon fiber increases stiffness.

Stability

- Fits virtually every putter ever made. Easy to install.
- Market tested by real golfers with 99% satisfaction.
- Balances slightly heavier than steel.
- Replaces 50-year old steel shaft technology.
- Improved feel without changing your stroke.

	Tip Diameter	Butt Diameter	Length	Weight	Flex	Torque
Stability Tour	.355 .370 .390	0.6 Inches	37 Inches	102 gm	Ultra Tour Stiff	1°
Stability	.355 .370 .390	0.6 Inches	37 Inches	125 gm	Ultra Stiff	1°

Look

Streamlined, slim look which tapers to a 13% reduction in the shaft diameter.

Balance

Stability Tour will balance like a steel shaft which makes it easy to recreate a specific swing weight when re-shafting.

Feel

With 30% more carbon fiber for crisp, responsive sound and control preferred by better golfers.

99% Of Golfers Prefer Stability Over Steel.
